- 2, Search "Lite Guardian" in Google play or iOS store to download the APP

Bind the watch with the APP

1. The watch only support GSM/GPRS network, Please use the standard Nano-SIM card. Open the cover on the back of watch, correctly insert the Nano-SIM card, install the back cover. Long press "on/off" key to turn on the watch.
2. Start the APP: Lite Guardian. Register new account or login existing account, choose "Senior Watch" to bind the watch.
3. Scan the QR code on the rear cover or enter the watch ID number to bind the device.

4. After binding, you can check and set the watch function from mobile APP.

Functions and instruction

- Check the real-time location by the APP.
- **Time calibration:** please choose your local time zone in the "Watch time and language" interface on the APP.
- **Phone book:** add contacts via the APP and save, contact book on watch would be synchronized accordingly, and the initial 3 contacts would be default SOS emergency contact person.
- **SOS:** When the device is on line normally, press SOS button for 3S, it will start SOS function, if no one answers, it will dial circularly for two rounds to the three emergency contacts; Any of the three emergency contacts answer the SOS phone, it will stop calling circularly; It will send alert message to the three SOS emergency contacts in the same time for help.

- **Phone call:** go to contacts book to choose contacts, click on call icon to make phone calls.
- **Call firewall function:** only the contacts in the phone book can call the watch.
- **Medication reminder:** can set three alarm clock to remind by the APP.
- **Health monitoring:** support pedometer function, sedentary reminder and heart-rate detection function.
- **Instant chat:** it enables app to send voice and text message to watch, however watch can only send voice message to the APP.
- **Language setting:** please choose the language in the "Watch time and language" interface on mobile APP.
- It can also set from mobile app to disable the watch for special periods, to set alarm, to find the watch, to power off the watch remotely, to check the historical track, etc.

APN setting

Please set the APN firstly, or it may be unable to obtain positioning data.
How to set APN: APP → Me → Advanced Setting → APN Setting → Fill in APN (based on SIM card provider's APN parameter) - then automatically generate a SMS command after you submit, text this message to the watch SIM card phone number.
Notes: Ensure the GSM signal on the watch is normal before setting APN, and make sure the SIM card activates the data and SMS function.
